

A Multidisciplinary Approach to Epistasis Detection

17 - 21 July 2023, Leiden, the Netherlands

Scientific Organizers

- Marleen Balvert, Tilburg University
- Johnathan Cooper-Knock, University of Sheffield
- Alexander Schoenhuth, University of Bielefeld
- Letitia Sng, CSIRO
- Michael Snyder, Stanford University
- Natalie Twine, CSIRO

Topics

- Epistasis Detection
- Statistical Methods
- Machine Learning
- Combinatorial Approaches
- Population Structure

The Lorentz Center organizes international workshops for researchers in all scientific disciplines. Its aim is to create an atmosphere that fosters collaborative work, discussions and interactions. For registration see: www.lorentzcenter.nl

Understanding the interactions between genetic characteristics helps us understand the development of plants, animals and humans.
